

Title: Full Stack Developer Intern
Location: Baner, Pune
Department: Cloud
Reports to: Technical Lead

Key Responsibilities:

- Work across the development of both frontend and backend components of web applications for multiple projects.
- Build and implement new features and supporting infrastructure aligned with evolving business requirements.
- Ensure application performance, scalability, and reliability, while maintaining strong coding and design standards.
- Design, develop, and integrate RESTful APIs and backend services.
- Participate in code reviews, debugging, and optimization of existing systems.
- Collaborate with the team using agile development methodologies (sprints, stand-ups, reviews).
- Write clean, maintainable, and testable code and assist in unit/integration testing.
- Continuously learn and adopt new technologies, tools, and development practices.

Essential Skills & Qualifications:

- Currently pursuing a **Bachelor's degree (or equivalent)** in Computer Science, Information Technology, or related engineering field
- Strong understanding of Data Structures and Algorithms
- Good knowledge of Object-Oriented Programming (OOP) concepts
- Understanding of database systems and ability to write queries (SQL/NoSQL basics)
- Proficiency in JavaScript, with working knowledge of Node.js and React
- Familiarity with Python
- Experience (self-taught, academic projects, or internships) building web applications involving both frontend and backend
- Experience designing and consuming RESTful APIs
- Good debugging, problem-solving, and code optimization skills
- Basic understanding of unit and integration testing.

What Haber Offers:

- Exposure to real industrial impact—with models and algorithms deployed to optimize processes and sustainability.
- Supportive, hands-on culture emphasizing learning, experimentation, and innovation.
- Opportunities to work with modern ML, AI, and automation technologies on diverse, challenging projects.

About Haber:

With a mission to help industries become sustainable by converting data to actionable intelligence, our AI+IoT based technology helps our customers spend less time collecting and analysing data by predicting results and

driving value in real-time. Our technology has been assuring performance and significantly reducing operating costs, as well as, reducing water and energy footprints for our customers.
